

At a glance

Technology that lasts

selekta REFINE combines a system from HPL production that has been tried and tested for decades with a newly developed production process. This combination enables façade designs with the best UV protection and durability.

Fast & flexible

The easy workability of the façade profiles and installation on familiar substructure systems saves valuable time and money. REFINE is ideal for combining with other façade systems.

Protection & Environment

selekta REFINE provides lasting protection for your building. The long service life and virtually maintenance-free surface benefits both the building owner and our environment.

Sustainability

REFINE consists exclusively of renewable materials.

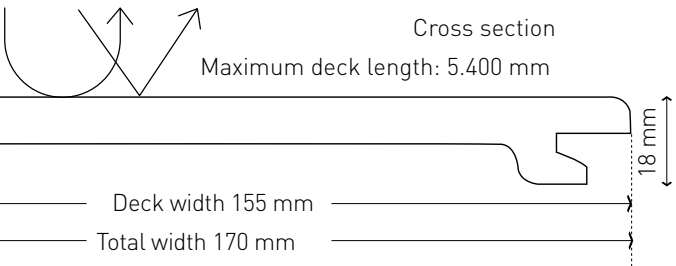

Timelessly unique

Our decors are timeless and give your building an incomparable aesthetic. In addition to the standard colors, almost all RAL colors are available on request. With innovative materials, WERZALIT offers consistently beautiful façades that are characterized by low maintenance.

Available in the following versions:
Fire class Euroclass D-s2;d0
Euroclass B-s2;d0

Maximum UV and weather resistance

Front page: Facade Dekopan birch - 156

Design diversity and economical assembly

selekta REFINE façade profiles offer almost unlimited design possibilities. They can be installed vertically, horizontally and diagonally. And they can be perfectly combined with other façade systems.

WERZALIT façade profiles are also easy to work with. With a high degree of prefabrication, well thought-out installation systems, large fixing distances and a comprehensive range of accessories, WERZALIT façade profiles are extremely economical to install.

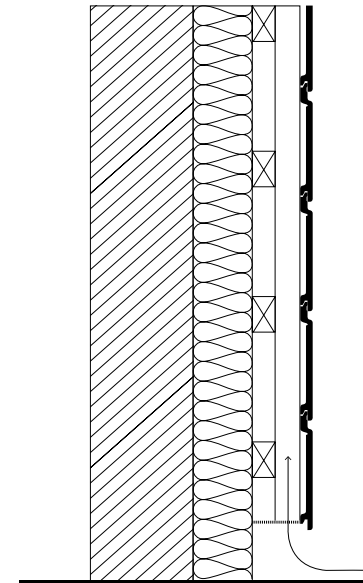

The REFINE advantages

- Extremely weather-resistant and UV-stable
- Low maintenance - no repainting
- Fast, economical installation
- 10-year guarantee
- PEFC-certified and 100% recyclable
- Made in Germany

The WERZALIT climate facade

As a suspended, rear-ventilated façade, selekta REFINE provides lasting protection for the building. The façade is kept dry, guaranteeing a long service life. This system, which has been tried and tested for centuries, is also unsurpassed when it comes to climate protection.
